

Have you ever thought about becoming a Microbiology Major?

Come to the Microbiology Awareness Event

Friday, May 9, 2008 (1:30-3:30 PM)

Morrill IV North, 2nd floor

(Conference Room and Room N201)

*****Refreshments and Door Prizes!!*****

What is Microbio about...

...Bacteria, Viruses and Parasites which cause diseases like Anthrax, the Flu or Malaria

...Yeast which is not only important for brewing beer

...Molecular Genetics to improve the understanding finally of ourselves

...Organisms which live deep down in the ocean and at temperatures of over 200°F

Our Labs...

...Learn about African Sleeping Sickness

...Study Organisms from deep Sea Hydrothermal Vents

...Investigate the correlation of Chlamydia and Asthma

...Develop a battery composed of Bacteria

...Explore the world of Bioinformatics

...Develop new Biofuels for a greener world

P.S. Don't worry about physics, math or chemistry we all got through this!

Check out: www.bio.umass.edu/micro/ or write an e-mail to our Professors or just stop by at a Lab that interests you!
